

Suregrave Wizzard 6

This low cost compact engraver is suitable for engraving and personalisation on flat and round objects. Ideal for small labels, badges, coffin ware, electrical labels, pet tags, rating plates, tallies and giftware.

Options include a wide range of holding jigs for many items. A rotating chuck is also available making it possible to engrave round objects such as christening cups and the inside or outside of rings.

Quiet and compact, the Wizzard 6 is suitable for retail, office or workshop environments. The vice holding assembly features a clever split design allowing for out size items to be held securely and engraved.

In use the Wizzard 6 is simple to operate thanks to a clear and precise on screen control panel and automatic cutter setting. SureLab Lite software is included which allows import of logos and thousands of font styles. Customers wanting to scan or create logos can upgrade to SureLab Professional without the need for further training.

Suregrave also give you the opportunity of growing your business. If you outgrow your Wizzard 6 within 12 months we will part exchange it for the full purchase price against one of our larger engraving systems.
